

## **Program Discontinuance Proposal:**

**Associate of Science in Business Management with an emphasis in Logistics (AS)  
Logistics (JSC)  
Logistic Management (COA)**

### Rationale:

The Associate of Science in Business Management with an emphasis in Logistics, along with the Job Skill Certificate (JSC) and Certificate of Achievement (COA) were created to meet projected needs for the Wal-Mart Distribution Center. Despite the projections, the need never came to fruition. The classes and degrees were never offered, and faculty have never been secured to teach the required courses. After consulting with the Wal-Mart Distribution Center again, during the spring semester of 2020, confirming the degree was still not needed, we are recommending the discontinuance of the Associate of Science in Business Management with an emphasis in Logistics, along with the Job Skill Certificate (JSC) and Certificate of Achievement (COA)

### Impact:

The discontinuance of this program will have no impact on full-time staff or faculty (full-time or adjunct) that teach in this area. There is no impact, fiscal or otherwise, on the CTE division or Porterville College as a whole.
